

Buffalo, NY
8/8/2018

My fellow Patriots,

We Americans have just entered a new phase of totalitarian control. The unprecedented censorship and attacks by the Big Tech Left against Conservatives, Christians and Trump supporters is nothing short of criminal. I will even go so far as to label it terrorism. The Big Tech Left include the social media giants, such as Alphabet, Facebook, Twitter, Apple, etc.

For me, the line in the sand was Youtube completely deleting the Infowars channel. I believe it is nothing short of a modern day Kristalnacht and the forced wearing of yellow stars.

I will present my arguments for why they are criminal in a later paragraph. Having said that, it is the role of Government to protect the Natural or God-given individual rights of every American. Chief among them the First Amendment.

“Amendment I

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.”

Since the Government, for whatever reason, is reluctant to act to protect said rights, it is up to the People to take lawful and legal action to regain these rights. There are a number of things that we as Patriots and Americans can do. Before I describe my ideas for taking back our rights, let me first present my arguments for why I think the actions by the Big Tech Left are criminal and “terroristic.”

1) By many estimates, the Big Tech Left control the vast majority of social media traffic on the Internet. As such, they are a DE FACTO monopoly, or at the very least a Trust. Trusts are anathema to free market capitalism. A trust can not exist under a free market, because a smaller competitor can always enter the market with a lower price point, since the smaller competitor has less overhead.

In other words, the Big Tech Left became the size that they are by colluding with the Government to shut out their competition, either by acquiring the smaller start-ups or lobbying the Government to enact laws that prevent competition.

In this event, I argue that the Big Tech Left are effectively acting as de facto utilities, much like the electricity or gas service to your home or business. Let me present the following allegory for logical analysis. Suppose that you own a factory that consumes 100 kW of electricity to run the machines. Now suppose that you painted your factory floors a bright coat of ugly green paint. The CEO of the local electric provider visits your factory and is appalled at your choice of floor color.

He then says, “So sorry, I don’t like green. You have violated our community standards. Your account and all electric service lines are now canceled effective immediately.” Your factory grinds to a halt, your heating system fails, your pipes freeze over and the factory floods. All of the machines are ruined, the real estate is ruined from the run-off from the machines. Just like that, you are homeless

and destitute, unable to pay creditors or the business loan to the bank. Alternative energy sources, such as solar or wind, for 100 kW worth of electricity is just not a viable option. That factory owner is destroyed. How is this different than what Youtube has done to Alex Jones? If they do not like what he says, let them use legal due process where everyone is innocent until proven guilty. They have failed to do so, effectively nullifying a Person's Natural rights. Therefore, the actions of the Big Tech Left are criminal.

2) This brings me to my next point. Some may argue that the Big Tech Left are private businesses, that they can do whatever they want. That is false, as I have already argued in the first point. Secondly, they are NOT private businesses. They are Publicly Traded Companies. They have a legal obligation to their shareholders to maximize profits. I fail to see how excluding millions of subscribers based solely on arbitrary definitions of "permissible speech" can be even remotely good for business. If the Big Tech Left went through with this, it is surely with the blessing of corrupt politicians who promised protection, or other graft. This clearly constitutes an illegal political contribution of vast and immeasurable quantity, as well a breach of fiduciary responsibility to shareholders, both criminal actions. Additionally, how is this any political meddling different than the "alleged" Russian interference in our elections?

3) Finally, I will present an argument for why I consider it terrorism. Terrorism is defined as violence perpetrated for political reasons. Taking away someone's Natural Rights in which they become ruined and destitute, without due process, for political reasons IS violence for political reasons. In other words, it is terrorism. How is this different than physically gagging a person and preventing their freedom of speech in a public square when they are trying to get a redress of their grievances?

President Donald Trump is a good man, and I support him, but he is too busy getting America Great Again, dealing with foreign trade, North Korea, Iran, Russia, the E.U., etc. He may not have the time or the information presented to him on what is really happening. Hopefully, I have presented decent arguments for why I believe that what has happened is a monumental shift in our society, for the worse. It is up to us as Patriots and Americans to take legal and lawful actions to take back our Natural Rights.

As an Electrical and Computer Engineer, and as a HAM radio operator, it is my opinion that we should take the following legal and lawful actions to take back our rights:

1) De – Big-Tech-Left yourself. We can not feed the beast. I would like to see every Patriot close their Big Tech Left accounts, and find alternatives elsewhere. For your consideration:

a) Instead of Gmail, use a service such as Protonmail, or others.

b) Instead of Youtube, use a service such as Bitchute.com or Invidio.us.

c) Instead of Facebook Messenger, use a service such as Zello.

d) Use duck-duck-go, Startpage or Ixquick to do your Internet searches.

d) Install a copy of the Tor Browser on your computer and mobile phones. Use it to become familiar with it. Open a new tab and navigate to Startpage or Ixquick search engines. Search for “The Hidden Wiki”. On it you will find information on how to get news and information using the Tor network. Don’t do anything stupid with the information you find. Just as with a firearm, do everything according to the law.

We should have a meeting where members bring in their computers or mobile phones and get everyone squared away.

2) Establish contact lists that include the names and contact information of your squad-mates. These should be kept in an encrypted file on your computer or mobile phone. Ask me how to do this. A hard copy should be kept at an undisclosed location.

3) Continue training with your HAM radios, especially your hand held VHF radios. They are cheap, of decent quality and can work over a few miles. Make sure that your radios are programmed with the current Channel List. We will be doing more rounds of radio programming. We need to establish at least a few simplex frequencies to use when operating in our Squad Zone, as well as a few repeaters to use for every Squad Zone. I think that these are goals most members can attain. There are stretch goals, such as getting onto HF, but this can be problematic technically and financially for most members.

4) To deal with the tail risk of wholesale denial of Internet access, or the abhorrent bill being considered by Senate Democrats at this time, which involves Chinese Communist style control over Internet Access, I will be investigating alternative means of getting online onto the Internet, as well as providing Internet Services. It is not possible to “shut down” the Internet. That is not how it works. It will reform and reroute. There will be isolated pockets of networks, but they too will become linked up over time. The following are stretch goals to reach:

a) Establishment of an HF link to an email service.

b) Establishment of a Web Server in the “Cloud”, whose services use peer-to-peer networking, and whose servers exist nationally and internationally.

c) Establishment of Web Server services on the Tor Network.

Together, the vast number of Patriots taking individual actions to take back their rights will be the pebble in David’s slingshot that takes down Big Tech Left Goliath. Thank you for your time.

Sincerely,

Mark Khusid
